

Dawson Britton

Norfolk, VA | dawson.r.britton@gmail.com | dawsonbritton.github.io (portfolio of personal projects)

SUMMARY

Mechanical engineering student at Old Dominion University and IREC Recovery & Simulation Lead who designs, builds, and tests real hardware, from CAD to flight electronics. Seeking aerospace and mechanical design internships.

EDUCATION

Old Dominion University Norfolk, VA
B.S. Mechanical Engineering Expected 2029
Relevant coursework: Statics, Materials Science with lab (SEM microstructure, grain-size analysis), Physics II

ROCKETRY LEADERSHIP

Recovery & Simulation Lead, IREC Team 2025 – 2026
Old Dominion University Rocketry Club, Intercollegiate Rocket Engineering Competition Midland, TX

- Led recovery and flight simulation for "Hailstorm," a 10,000 ft M1845 rocket (simulated 10,755 ft, Mach 0.88).
- Designed the dual-deployment recovery system: 24 in. drogue at apogee and 100 in. main at 1,000 ft.

PROPEL Competition Lead 2026 – Present
Old Dominion University Rocketry Club

- Leading the team designing and building three Level 2-class rockets for the PROPEL student rocketry competition.
- Developing simulation designs for the club's supersonic research rocket.

PERSONAL PROJECTS

Rocket Flight Computer 2026
Arduino Nano, C++, ICM-20649 IMU, BMP280 barometer, SD logging

- Built and programmed a dual-deploy flight computer that detects launch, burnout, and apogee and fires recovery charges.
- Validated on hardware: 20 Hz control loop, 0.14 m/s velocity noise, backup timers within 0.2 s of spec, and inhibits that block main deployment on the ground.
- Found a sensor-library register bug by bench measurement that left the accelerometer sampling below 1 Hz; fit the flight build in 99% of the 30 KB flash.

High-Power Rocketry Certification
OpenRocket, Onshape

- Earned Level 1 with an Iris 3.1; building "TBD," a dual-deploy Level 2 rocket carrying my flight computer.

WORK EXPERIENCE

CAD Designer May 2026 – Present
Signature Canvas Makers Hampton, VA

- Develop flat patterns in Rhino 3D for custom boat canvas from 3D scans of customer boats.
- Produce Eastman cutting-table files and build sheets that guide fabricators through assembly.

Lead Technician March 2025 – Present
Strickland Brothers 10 Minute Oil Change Gloucester, VA

- Diagnose technical problems, support and train technicians, and perform maintenance to spec.

Shop Assistant April 2021 – August 2025
PEB Enterprises LLC Gloucester Point, VA

- Created 3D models and CAD drawings for product presentations; ran trade show demos and sales.

SKILLS & CERTIFICATIONS

CAD: Onshape and Rhino 3D (advanced), SolidWorks, Autodesk Inventor; 3D scan-to-pattern, CNC cut files, drawings

Analysis & Simulation: OpenRocket (flight and recovery simulation); currently learning ANSYS and Simulink

Programming & Electronics: Arduino / C++, sensor integration (I²C, SPI), embedded debugging and hardware testing

Fabrication: Welding, CNC, general fabrication, automotive repair

Certifications: Level 1 High-Power Rocketry; ASE A1 Engine Repair (May 2024)
